1 Map the current journey

Pick one process you repeat often. Map how it actually happens today, step by step, and tag who (or what) does each step.

PRO TIPS & HELPFUL PROMPTS

- There's no right or wrong answer here. Don't overthink it!
- Think in tasks. What are the major steps that need to happen in this workflow?
- What should be AI, human, or some other tool?
- What data do you need for each step?
- What will the AI NOT know? How will the humans remember to think about that?

TOOLS YOU CAN USE

Pen, paper and sticky notes, the next page of this worksheet, or a Miro board.

TAG EACH STEP

AI AI does it H Human does it T Non-AI tool

EXAMPLE

Internal stakeholder meeting prep, using a company copilot. Goal: run a meeting that moves my agenda forward and builds stakeholders' confidence in me.

Gather context	Set agenda & attendees	Schedule meeting	Prepare materials	Manage tricky stakeholders	Conduct meeting	Follow up
Review previous notes & decisions AI H	Draft agenda & meeting goals AI H	Add attendees H	Prepare deck AI H	Decide who to meet with first H	Take notes AI H	Review notes & action items H
Review company priorities H	Finalize agenda H	Find a time that works T H	Review deck with key people H	Schedule 1:1s T H	Run the meeting H	Send to attendees H
Note nuance about stakeholders H	Decide who to invite H	Send meeting invite H	Finalize deck H AI	Revise the deck AI H	Record decisions & action items AI H	Track action items AI H

Read each column top to bottom, then move left to right.

1 Your current journey

Name the phases across the top, list the steps underneath, then circle who does each one.

PROCESS I'M MAPPING

GOAL: WHAT DOES SUCCESS LOOK LIKE?

Phase1	Phase2	Phase3	Phase4	Phase5	Phase6	Phase7
AI H T	AI H T	AI H T	AI H T	AI H T	AI H T	AI H T
AI H T	AI H T	AI H T	AI H T	AI H T	AI H T	AI H T
AI H T	AI H T	AI H T	AI H T	AI H T	AI H T	AI H T
AI H T	AI H T	AI H T	AI H T	AI H T	AI H T	AI H T

CIRCLE ONE OR MORE AI = AI does it H = Human does it T = Non-AI tool Need more room? Keep going on sticky notes.

2 Zoom out and reflect

Imagine following this process every time you ran it over the course of a year.

What human skills are getting sharper?

For example: editing, synthesizing, deciding what matters most.

What human skills are getting weaker?

For example: first-draft thinking, reading the room, building relationships.

What rituals or practices could help with the weakening skills?

For example: write your own point of view before asking AI.

Where can we simplify? How can we make this delightful?

3 Map the new journey

Redesign the flow so AI assists and humans decide. Use AI as a brainstorm partner, then make the calls yourself.

COLOR OR MARK EACH STEP

- AI assists: drafts or surfaces
- Human decides: owns the call
- AI + human loop
- ★ Delight ritual

BRAINSTORM WITH AI

"Here's my current journey map and my reflections. Help me design a future-state journey where AI assists and humans decide. For each phase, suggest what AI could draft or surface, which calls a human must own, and one ritual that strengthens a weakening skill or adds delight."

GUT-CHECK THE IDEAS

- Does a human still own every key decision?
- Are we protecting the skills we want to keep sharp?
- Is it simpler than before? Where's the joy?

Proposed flow: AI assists, humans decide
